

SystemC Component Model: Detailed Simulation Comparison

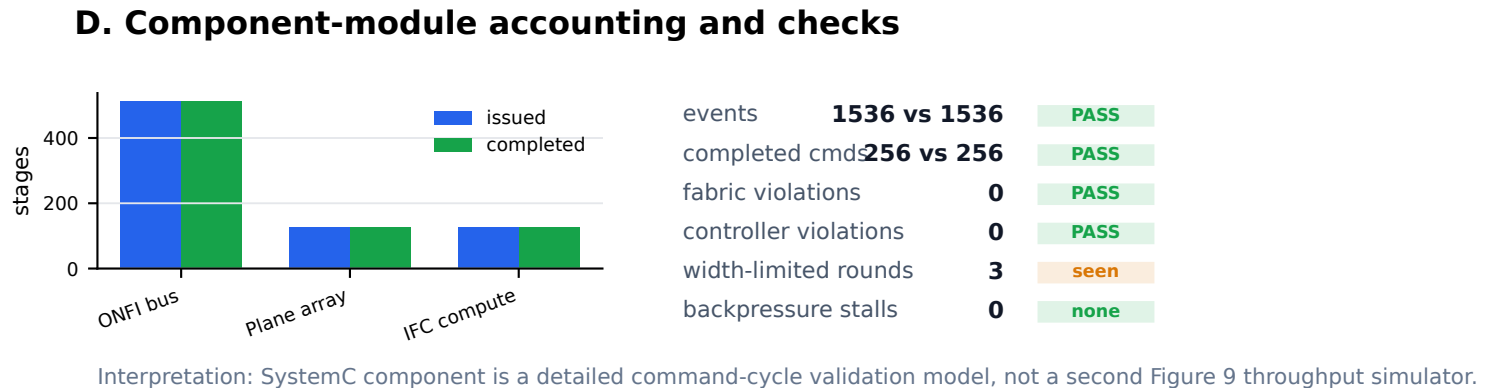

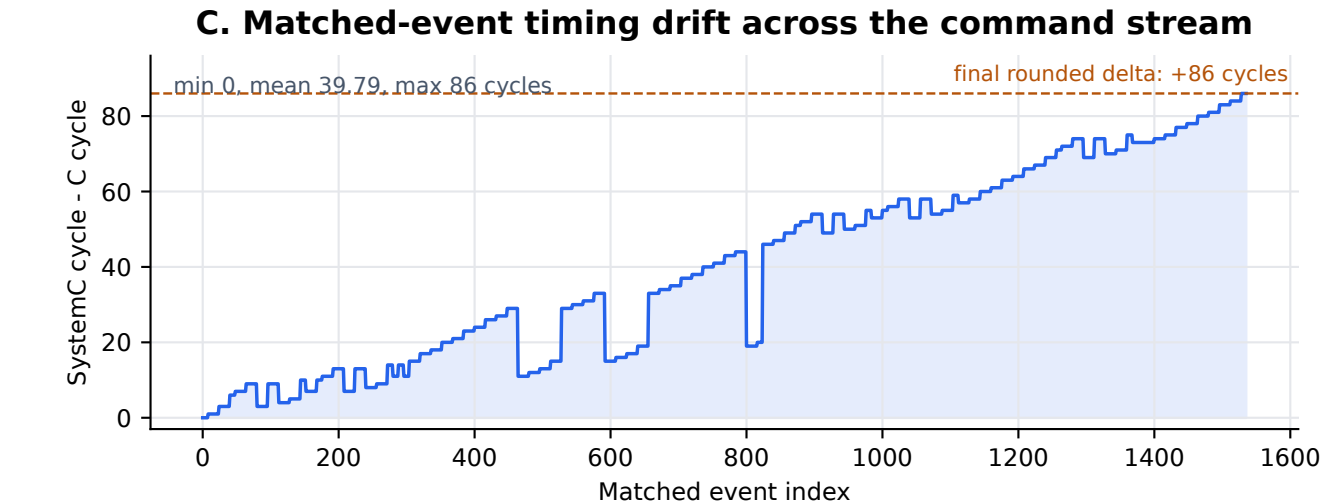

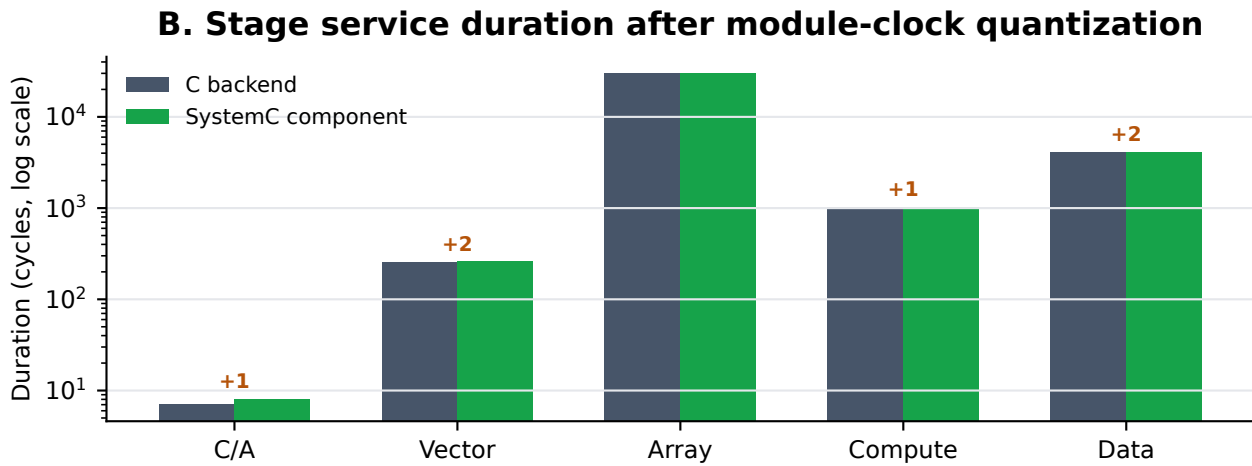

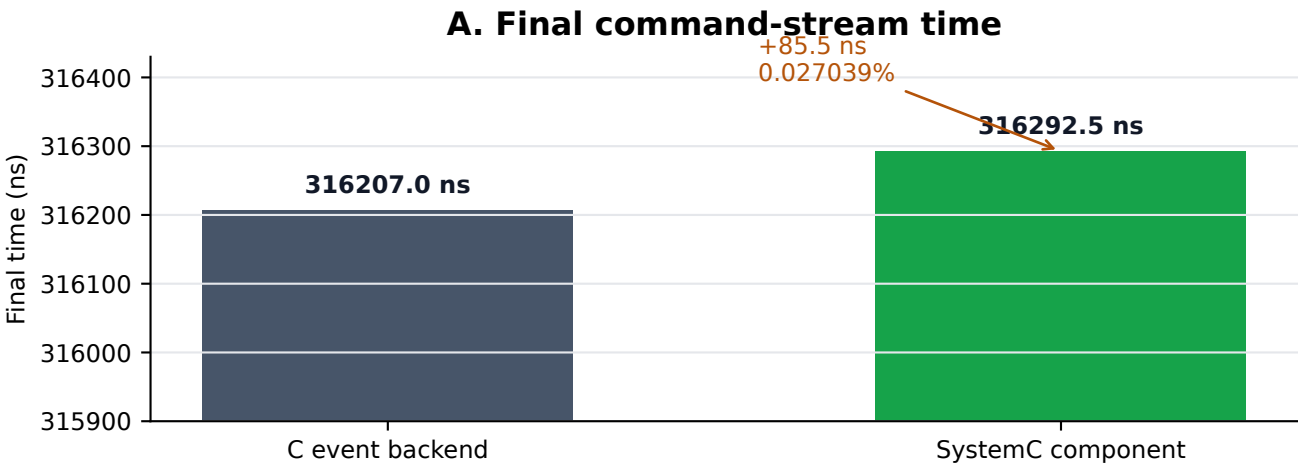

Representative IFC command stream compared against the standalone C SSDsim-derived event backend.

Command stream
256 commands
128 READ_COMPUTE + 128 READ_SLICE

Event contract
1536 events
Exact issue/complete count match

Final-time delta
+85.5 ns
0.027039% vs C backend

Component settings
2.5 ns clock
issue width 8, FIFO depth 8

Source: results/systemc_component_*.csv and results/ssdsim_ifc_event_trace.csv. C throughput remains the paper-facing performance result.
